---

Table 9 provides the accuracy and prosodic properties of the 30 stimuli used in the post-hoc analysis (Section 4). Since the number of participants was not the same for Spain and Argentina, the accuracy for Spain + Argentina does not necessarily amount to the mean of the accuracy for Spain and the accuracy for Argentina.

**Table 9.** Accuracy and prosodic properties of 30 stimuli (post-hoc analysis).

	Accuracy (%) Spain + Argentina	Accuracy (%) Spain	Accuracy (%) Argentina	ToBI (Subject)	Scaling	Align H- $\sigma$ ]	Align L- $\sigma$ ]	Align L-XP]	Steepness	Duration	Post-focal devoicing
